12. Emigrating insects not usually social - make an odder

31 Bees, wasps & ants. female lays foundation. Then in Termites / 35 they seem never to work. Full a consist of locusts of ants & Bees or

35 Termites content for a female

74 Tad and seeds. Dun it's our fellow of nest - 1. do slave ants

Bees (2)

231 Beetle living in hot-bed & Stanley Boiling water.

234 Beetle charming (2)

420 Shivers of insects falling

471 Definition of (2) - 473 good (2) (2)

476 Substitution of (2) material for another

481 Insects of same (2) species

492 mistake (2) 496 good remarks in at season - 507 good

511 winter (2)

514 Reason (2)

Red all, with idea

no workers - then few greens & lastly the green

the in-kind is neither stain nor of did in-kind when

354

a further worker in theory
Back. - a metaphor of heredity
pen-pets, not to have been in heredity
spurred, simple & good for out-pit
Hagen. What I had plays to it in local
note stand. If heredity plays for us
in time, new time, he found it had
then did imply several not allow
contemporary

There is controversy between our hot-tube section & reason - a person knitting
meat in accident & person can not play - it is our argument that
not person become a person did not invent a defect repair.

{ Spring Bees boring holes }
p. 523 references on ditto

Ann Trans Vol VI p 222. Hubei def

He has seen large Hubei bees try to
enter "fives" & finally bite hole in

corolla, whilst smaller Hubei

entered the corolla - He has

seen them bite the tubes of "L'ancolie"

He sees pods of the fives were not

injured.
